

Barreto, Hugo		
The landscape of adaptive evolution of a gut commensal bacteria in aging mice		47
Blaxter, Mark		
The Tree of Life: Sequencing endless forms		48
Degli Esposti, Davide		
Proteomic profiling of adaptation to chronic cadmium exposure in a field population of the freshwater crustacean Gammarus fossarum.		49
Di Pietro, Antonio		
DNA transposons drive adaptive evolution in the fungal cross-kingdom pathogen Fusarium oxysporum		50
Eriksson, Karolina		
Development of bacterial predation resistance to protozoan grazing		51
Garbsch, Frauke	Presenter: Greiner, Stephan	
A photosynthesis operon in the chloroplast genome drives speciation in evening primroses		52
Hershey, Benjamin		
Tumor ecology, an investigation into the functional role of intra-tumoral metabolic heterogeneity		53
Kato, Yasuhiko		
Molecular mechanism of adaptive sex ratio adjustment in the water flea Daphnia magna		54
Kato, Yasuhiko	Presenter: Watanabe, Hajime	
Monitoring of hormonal activities in the water flea Daphnia magna using genome editing tools.		55
Konstantinidis, Dimitrios		
Directed coevolution for improved production of nutraceuticals		56

La Torre, Renato		
Comparative mitogenomic codon usage analysis in gastropods from different habitats		57
Laman Trip, Diederik		
Cells collectively reshape habitability of temperature to help each other replicate		58
LaMont, Colin		
Ecological control strategies for preventing viral escape		59
Langmüller, Anna Maria		
Temperature dependent fitness costs of ace insecticide resistance alleles in drosophila simulans		60
Moreno-Fenoll, Clara		
Single-cell imaging of Pseudomonas reveals dynamic localization of the extracellular iron-scavenger pyoverdinin		61
Nishigai, Shigetatsu		
Community dynamics of the microbiome while experiencing press disturbance by salt		62
Opalek, Monika		
The importance of non-quiescent yeast cells for persistence during starvation		63
Opalek, Monika	Presenter: Wloch-Salamon, Dominika M.	
Role of amino acid signalling in transition to quiescent state in yeast		64
Palkova, Zdena		
The environment regulates formation and dispersal of solid-liquid-interface biofilm of yeast		65
Persons, Jenna		
Environmental and genetic contributors to divergent metabolic rate in Astyanax mexicanus morphs		66
Phong, Connie		
Temperature scaling in developmental regulatory systems		67

Sato, Mitsharu	
Development of comparative metabolome analysis method for phenotype comparison of organisms	68
Vachova, Libuse	
Structured colony biofilms are altered by cell domestication, environmental changes or genomic mutations	69
Zaworski, Julie	
Constraints on horizontal gene acquisition in bacteria: Genetic analysis of a novel restriction-modification system.	70
Zheng, Yichen	
Selection for nitrogen limitation in fast evolving sites shapes transcriptome architecture in <i>Arabidopsis thaliana</i>: a population genetics approach	71
